Programming ASP.NET Core

Chapter 11: Creating an Angular Project

INSTRUCTOR: MD. HABIBUL HAQ domain.habib@gmail.com

22 July 2019

- Q1. Which command should you use to create an angular application named myapp?
 - A. ng new myapp
 - B. ng create myapp
 - C. ng init myapp
 - D. npm init myapp

Answer: A [Page: 211]

- Q2. Which command should you use to create an angular application named myapp with routing module?
 - A. ng new myapp routing
 - B. ng new myapp --routing
 - C. ng new myapp -il routing
 - D. npm new myapp --add routing

Answer: B [Page: 212]

- Q3. Which file contains the configuration for the Angular development tools?
 - A. angular.json
 - B. package.json
 - C. tsconfig.json
 - D. tstlint.json

Answer: A [Page: 213]

- Q1. used to specify the packages that the application relies on, including Angular itself. one is not a section required in package.json file in an angular application?
 - A. dependencies
 - B. devDepedencies
 - C. scripts
 - D. resources

Answer: D [Page: 217]

- Q2. Which section of the package.json files is used to specify the packages that the application relies on, including Angular itself?
 - A. dependencies
 - B. devDepedencies
 - C. scripts
 - D. resources

Answer: A [Page: 218]

Q3. Which section of the package.json files is used to specify the packages that are used in development, such compilers and test frameworks

- A. dependencies
- B. devDepedencies
- C. scripts
- D. resources

Answer: B [Page: 218]

Q4. Which file contains the details of dependency packages required by the angular application and the development tools and defines the commands that run the development tool

- A. package.json
- B. tsconfig.json
- C. ngsw-configuration.json
- D. angular.json

Answer: A [Page: 213]

Q5. Which file the TypeScript compiler require to prepare an Angular project for use?

- A. package.json
- B. tsconfig.json
- C. ngsw-configuration.json
- D. angular.json

Answer: B [Page: 213]

Q6. Which older contains the application's source code, resources, and configuration files of the angular application?

- A. e2e
- B. src
- C. node_modules
- D. the root folder of the app

Answer: B [Page: 213]

Q7. Which folder in an angular application contains the source code and contents?

- A. src
- B. e2e
- C. src/app
- D. src/assets

Answer: C [Page: 216]

Q8. Which folder in an angular application is used for the static resources required by the application, such as images?

- A. src
- B. e2e
- C. src/app
- D. src/assets

Answer: D [Page: 216]

Q9. Which file in angular application is used to provide support for features that are not available natively in some browsers, especially Internet Explorer?

- A. main.ts
- B. polyfills.ts
- C. karma.conf.js
- D. tests.ts

Answer: B [Page: 216]

Q10. Which file contains the TypeScript statements that start the application when they are executed?

- A. main.ts
- B. polyfills.ts
- C. karma.conf.js
- D. tests.ts

Answer: A [Page: 216]

- Q11. Which command will start the development server in an angular application?
 - A. npm start
 - B. node start
 - C. npm serve
 - D. ng serve

Answer: D [Page: 220]

- Q12. What is hot module replacement (HMR)?
 - A. A webpack feature that bundles all java scripts to use in browser
 - B. A module loader
 - C. A built-in webpack feature to start development server at a default port
 - D. A webpack feature that detect changes to the application's source or content files, the altered file is compiled, put into a bundle by webpack, and sent to the browser.

Answer: D [Page: 212]

- Q13. Which section of the package.json files is used to define commands that are used to compile, test, or run the angular application?
 - A. dependencies
 - B. devDepedencies
 - C. scripts
 - D. resources

Answer: C [Page: 220]

- Q14. Which dependency package implements a reflection API that is used to inspect decorators on classes in angular web apps?
 - A. reflect-metadata
 - B. rxjs
 - C. zone.js
 - D. core-is

Answer: A

- Q15. Which dependency package is used to implement the Angular change-detection system that is used in data bindings?
 - A. reflect-metadata
 - B. rxis
 - C. zone.js

D. core-js

Answer: B

Q16. Which dependency package provides an execution context for asynchronous tasks and is used to evaluate template expressions?

- A. reflect-metadata
- B. rxjs
- C. zone.js
- D. core-js

Answer: C

Q17. Which dependency package provides support for new JavaScript features for browsers that don't implement them?

- A. reflect-metadata
- B. rxjs
- C. zone.js
- D. core-js

Answer: D

Q18. Which dependency package is the module loader?

- A. systemjs
- B. @angular/core
- C. classlist.js
- D. core-js

Answer: A

Q19. Which package provides the type information for popular JavaScript packages so they can be used more conveniently with TypeScript?

- A. typescript
- B. typings
- C. rxjs
- D. classlist.js

Answer: B
